

## Step 1:

Clean the eyebrows carefully before you start the treatment. Make-up residues should preferably be removed with our Lash & Brow Cleanser. Afterwards use our PH neutral Brow Primer so that the eyebrows are free of grease. Comb the eyebrows with the mascara brush into the desired shape.

## Step 2:

Now apply a layer of the Brow Lifting Glue with a suitable applicator to the eyebrows and shape the hairs with a lash brush or the Y-Brush into the desired position. Work in small batches as the glue dries very quickly.

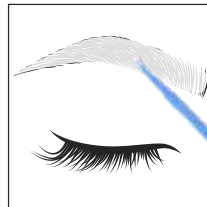

## Step 3:

Now apply a layer of Brow Perming Lotion No.1 with a lint-free cotton swab and leave it on for 5 minutes. For very strong eyebrows or for a particularly strong lifting result, the exposure time can be increased by 1-2 minutes. Calculate the exposure time for each eyebrow separately so that each eyebrow is treated with the lotion for the same amount of time. Try as far as possible to distribute the lotion on the hairs and avoid contact with the skin.

## Step 4:

After the exposure time, remove the Lotion No.1 with a dry lint-free applicator. Thoroughly clean off the lotion so that there is no residue left on the eyebrows.

## Step 5: (Select an option)

### Option 1 without dyeing or dye afterwards after step 6:

Apply the Brow Fixing Lotion No.2 with a lint-free cotton swab onto the eyebrows and leave the lotion on for 10 minutes.

### Option 2 color and fix in one step:

Mix the Brow Fixing Lotion No.2 - 1:1 with color. Here, use as much color as Lotion No.2 Apply the mixture to the eyebrows and leave it for 10 minutes.

## Step 6:

After the exposure time, remove the lotion with a lint-free applicator. Luke-warm water can be used for this step. The applicator please only moisten and do not make wet. Then clean the eyebrows again with a damp cotton pad and make sure that no lotion, adhesive residue or color residue left.

## Step 7: (Select an option)

### Option 1 Finish with the Brow Care Gel:

Now apply a thin layer of Brow Care Gel to the eyebrows and comb them well again. The Brow Care Gel does not clean off. It remains on the eyebrows..

### Option 2 Finish with Brow Styling Wax (Keratin Booster):

Now apply the Brow Styling Wax to the eyebrows and comb the eyebrows into the desired position. The Brow Styling Wax can be used daily after getting up in the morning to bring the eyebrow hairs that were misplaced during sleep back into shape.

## Warning:

Pay attention to exact compliance with the exposure times.  
In case of eye contact, rinse thoroughly with water.  
Keep out of reach of children.  
May cause allergic reactions.  
For professional use only.

NEVER use the same applicator for lotion 1 and 2. When the lotions come into contact with each other, they become unusable due to a chemical reaction.
